

What is Github ?

Part 1

GitHub is a code hosting platform for version control and collaboration. It lets you and others work together on projects from anywhere.

What is version control?

Version control is the management system that manages the changes that you made in your project until the end.

Advantages of Github

- It's free and it is open source.
- It is fast.
- It provides good backup.
- Code file access on any device.
- Built to collab.
